## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102 and 35 USC § 103***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 7-9, 12-14, 17-19, 21, 24, 30-37, 39-40, 43 and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by Logan et al.
4. Logan et al. teaches (independent claims 1 and 30) a system and method for exposing users to advertisements, the method comprising: obtaining a user specific set of data, *user data 143*, prior to distributing a media package (col. 5 lines 9-19); selecting a number of advertisements from a data bank *135* containing a plurality of advertisements based on the user specific set of data (col. 4 lines 15-27, col. 24 line 1 to col. 25 line 31, and col. 9 lines 41-57); and combining the selected number of advertisements with a requested set of media content to form a media package (*download compilation file 145*), and distributing the media package (col. 5 lines 19-36 and col. 15 lines 35-41).
5. Logan et al. also teaches (independent claims 9 and 39) an Internet user (col. 1 line 52) and localized data with geographically appropriate advertisements based on the obtained localized data (col. 9 lines 27-29), which, when inherently applied to the Internet, reads on with an appropriate geographic group of advertisements.
6. Logan et al. also teaches (independent claims 19 and 45) that the requested set of media content includes media content which has been previously distributed (col. 13 lines 45-55).

Art Unit: 3622

7. Logan et al. also teaches at the citations given above claims 2-3, 14, 31-34 and 37. Logan et al. also teaches claims 7 (col. 13 lines 3-20), 8 (col. 10 lines 3-4), 12 (col. 6 lines 48-51, col. 25 lines 4-14), 13, 17-18 and 40 (col. 25 lines 26-31 and col. 9 lines 41-57), 21 (col. 8 line 66), 24 and 43 (col. 14 lines 43-44), 35 (col. 29 lines 63 to col. 30 line 7) and 36 (col. 6 lines 48-51).
8. Claims 4-6, 10-11, 15-16, 20, 22-23, 25-29, 38, 41-42, 44 and 46-50 are rejected under 35 U.S.C. 103(a) as being obvious over Logan et al.
9. Logan et al. does not teach (independent claims 25, 47 and 48, and dependent claims 4-5, 15-16, 23, 26, 28, 42, 46 and 49) a network including a regional broadcast station and syndicated media content. Because these are obvious sources of the information and entertainment programming taught by the reference invention for its library consisting of a large number of diverse programs (col. 1 lines 39-47), it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add a network including a regional broadcast station and syndicated media content to the teachings of Logan et al.
10. Logan et al. does not teach (claims 22, 27, 41 and 50) that the ads are regional or national. As noted in para. 9 above, because these are obvious sources of the information and entertainment programming taught by the reference invention for its library consisting of a large number of diverse programs (col. 1 lines 39-47), it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add both regional and national ads to the teachings of Logan et al.
11. Logan et al. does not teach (claim 6) displaying ads as frames. Because this is the most common means for displaying ads on the Internet, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add the display of ads as frames to the teachings of Logan et al.
12. Logan et al. does not teach (claims 10, 29 and 44) a global positioning system. Logan et al. does teach a mobile receiver (col. 6 lines 18-32). Because GPS permits more precise geographic targeting of ads and provides the user with other benefits, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add GPS to the teachings of Logan et al.

Art Unit: 3622

13. Logan et al. does not teach (claims 11, 20 and 38) acquiring user data from an ISP or driver's license databases. Because both a readily available sources of good user characterization data, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to add the acquisition of user data from an ISP or driver's license databases to the teachings of Logan et al.

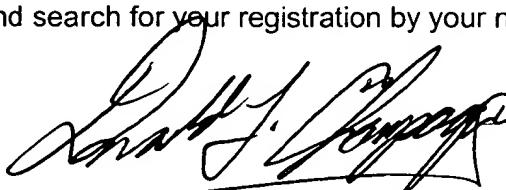

**Conclusion**

14. **COPY of REFERENCES** - Applicant is entitled to receive a copy of every reference cited by the examiner (except at allowance; MPEP 707.05(a)). Applicant should contact the examiner if a completed form PTO-892 is enclosed, but the cited references are not.
